

Leader in Electronic Protection System

Lightning Flash Density Map

The requirement for Lightning Protection is dependant on several factors which result in a Need for Protection calculation, these factors or considerations are

- ⚡ Lightning Flash Density (see map alongside)
- ⚡ The collection area of the structure
- ⚡ The intended use of the structure
- ⚡ The type of construction
- ⚡ What is housed within the structures
- ⚡ The location of the structure
- ⚡ The topography of the area

Map reproduced with kind permission of W.J Furse & Co Ltd.

All Proprietary materials are manufactured by W.J Furse & Co Ltd.

This map is based on data collected prior to 1999, since then the climate has warmed and strike density will have increased. **BE SAFE - DON'T RISK IT!**
